A SPECIAL NOTE CONCERNING THE DEATH CERTIFICATE AND CREMATION PERMITS:

It is a requirement of State Law that a cremation permit be issued by the State before the cremation can take place. This permit will not be issued unless the death certificate is completed and is signed by the certifying physician or medical examiner or coroner.

If a courier has to be sent out of town to obtain the certifier's signature, an appropriate charge will be made to defray our costs based on the amount of time and distance involved.

Please be advised that State Law requires either embalming and/or refrigeration if the cremation process is not started within 24 hours from the time of death. In cases where the death is a result of other than natural causes, (accidental, suicide, or homicide) the state may issue a 72 hour waiting period before the cremation process can be started.
